10-DAY PROGRAM BLOOD SUGAR

CLINIC LABEL

WHY IS BLOOD SUGAR SO IMPORTANT?

Glucose is the medical term for sugar in the blood. The pancreas regulates blood sugar levels by producing a substance called insulin. Insulin carries blood sugar to the body's cells to be used as energy. When the pancreas fails to produce enough insulin, blood sugar levels begin to rise and high blood sugar or possibly diabetes sets in. This is one of many issues that affect your ability to have normal blood sugar levels.

SYMPTOM CHECKER

Do you have Symptoms of Unbalanced Blood Sugar?

- Fatigue
- Fat around belly
- Irritable
- Craving for sweets and/or coffee
- Afternoon headaches
